CAPABILITY SHEET
2026

Commercial buildings

An electrical and lighting partner for architects

We protect your design intent through construction documents, permit and contract administration. One scope, one team, one set of issued drawings.

WHAT WE DO

We come to your design meetings

All of them, not only the kickoff.

Lighting and electrical, one scope

One team, one drawing set, one point of contact. Photometric models behind every specification.

We mark up your sheets

Inside your file structure, returned in a format you can drop straight in.

Requests for information answered in 48 hours

Or a written reason it will take longer. Contract administration is where projects fail; we treat it as the deliverable it is.

SERVICES

- Electrical engineering (stamped)
- Lighting design (architectural and photometric)
- Mechanical engineering
- Energy modelling (BCBC, NECB, LEED)
- Code consulting (BCBC, NBCC and municipal)
- Tenant fit-out and base-building coordination
- Construction administration
- Existing building assessments

WE LEAD WITH

Chilliwack Urban Park and Convention

Electrical and lighting design for a multi-purpose urban building, with the architect of record from concept through contract administration.

Brewery and distillery portfolio

Owner-operator brewery, distillery and taproom fit-outs across BC: process-driven electrical and lighting design.

Multifamily and parkade

EV-Ready and parkade designs across BC, useful when an architect is briefing on residential or mixed-use.

WHY OWNERS HIRE US

- Lighting and electrical at the table together. One scope.
- We speak architect. Redlines in your sheet structure, not ours.
- Every drawing your name appears on is reviewed by a second engineer before it is issued.
- Site presence for the questions that need it. A written response for the ones that do not.

COFFEE, NOT A PROPOSAL. TELL US WHAT YOU ARE WORKING ON.
